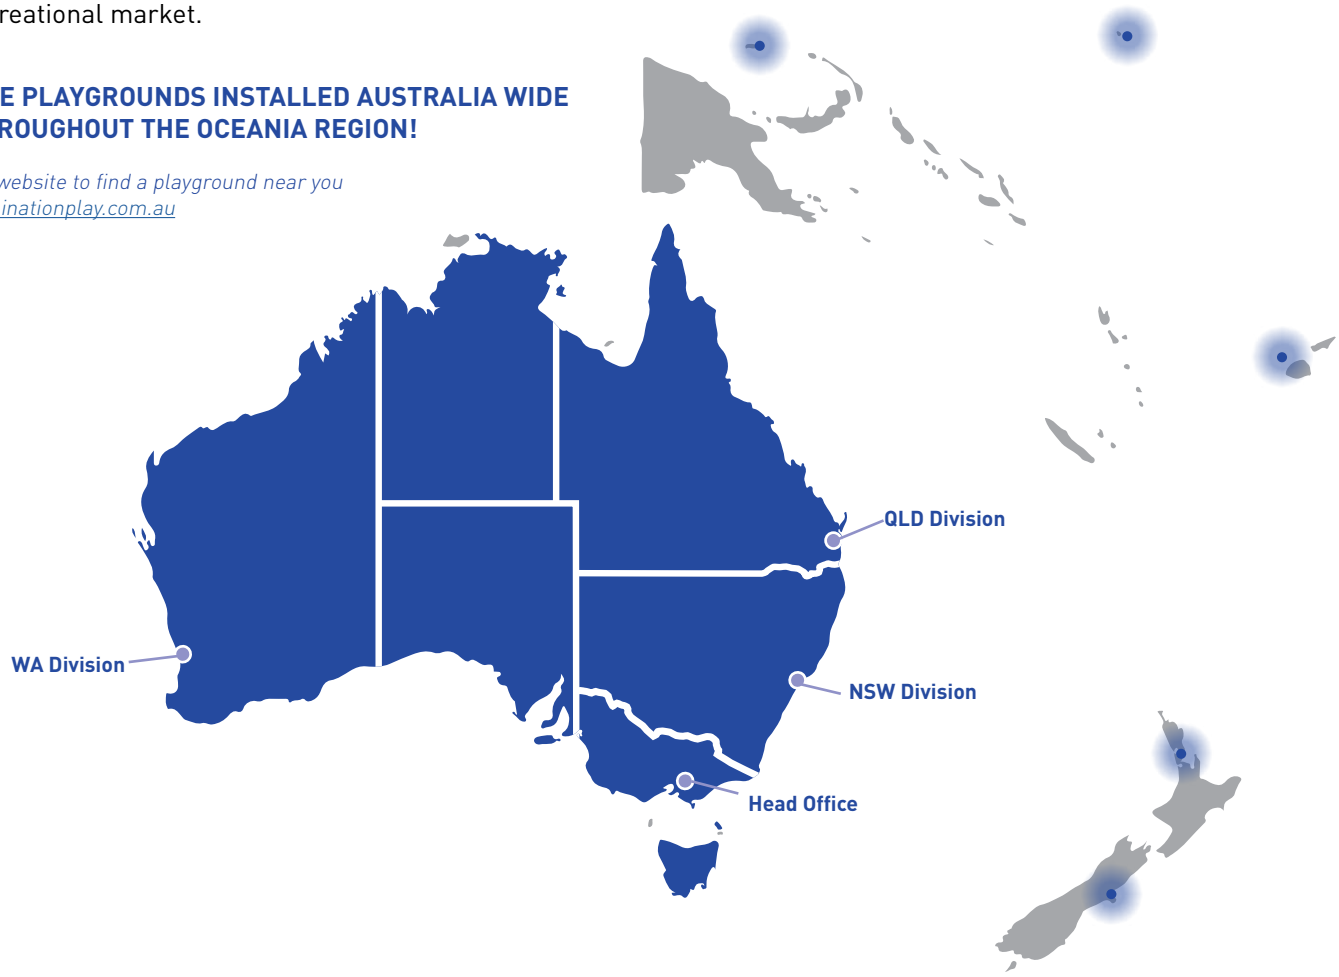
WELCOME TO IMAGINATION PLAY

TOTAL RECREATIONAL SOLUTIONS

Welcome to the latest Playdium catalogue. This is an introduction to part of Imagination Plays extensive range of products and services that we offer to the Architecture, Landscaping, Open space, Commercial, Education and Recreational market.

WE HAVE PLAYGROUNDS INSTALLED AUSTRALIA WIDE AND THROUGHOUT THE OCEANIA REGION!

Go to our website to find a playground near you
www.imaginationplay.com.au



IMAGINATION PLAY HAS THE LARGEST SELECTION OF CREATIVE RECREATIONAL SOLUTIONS IN AUSTRALASIA.

Imagination Play was established in 1995 by Director Mark Batty. Initially a playground installation and construction company, Imagination Play today stands as one of the most recognised commercial playground companies in Australia.

We offer high quality recreational equipment at affordable prices combined with superior customer service that exceeds the individual needs of our clients.

WE SOURCE THE HIGHEST QUALITY EQUIPMENT AND MATERIALS FROM AROUND THE WORLD ALONG WITH LOCALLY MANUFACTURED PRODUCTS.

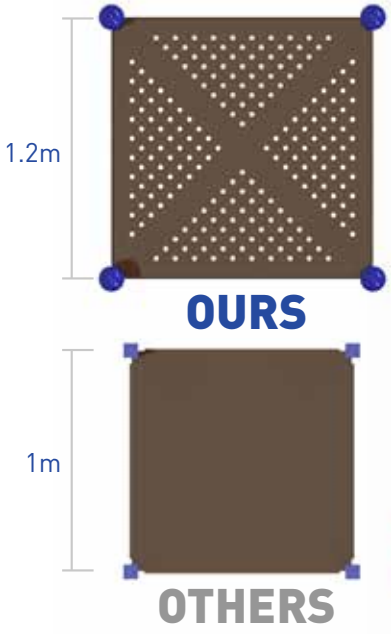
OUR PLAYGROUNDS ARE BIGGER THAN EVERYONE ELSE!

33% LARGER
THAN MOST OTHER MANUFACTURERS



OURS OTHERS

BIGGER PLAYGROUNDS EQUAL MORE CHILDREN, MORE PLAY VALUE, MORE FUN!

Playdium systems have a much larger footprint than the conventional 1m^2 and smaller deck systems. This allows for our play units to be much safer by providing more circulation and equipment interaction space for it's users.

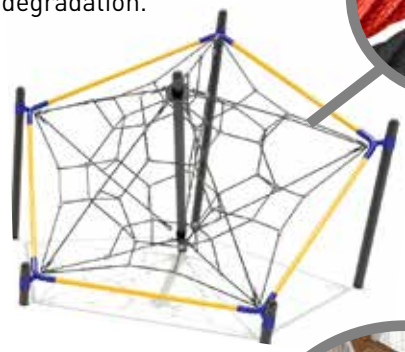
Our Playdium system utilises a standardised modular system to maximise design possibilities while simplifying the installation process reducing both time and cost.

POWDER COATED FOR A STRONGER DURABLE SURFACE

All Playdium series steel components (excluding the stainless steel fittings) are powder coated and baked at 220°C not the normal 180°C. This ensures a stronger durable surface to our steel components, with an excellent rate of colour retention and additional protection against corrosion.

STRONG LONG LASTING ROPE

The rope elements in our Playdium range feature a steel reinforced Polypropylene multicore rope design that offers strong, long lasting durability and colour-fastness to withstand UV degradation.



CUSTOMISED HDPE PLASTIC PANELS TO ADD YOUR PERSONAL TOUCH

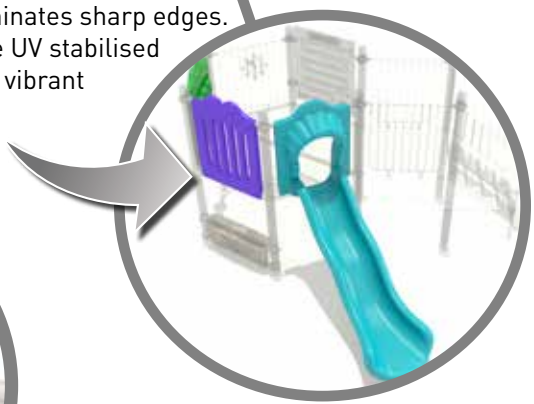
The use of HDPE extruded plastic panels gives the opportunity to customise Playdium combination units. A range of interactive panels with the option to add your own personal touch.

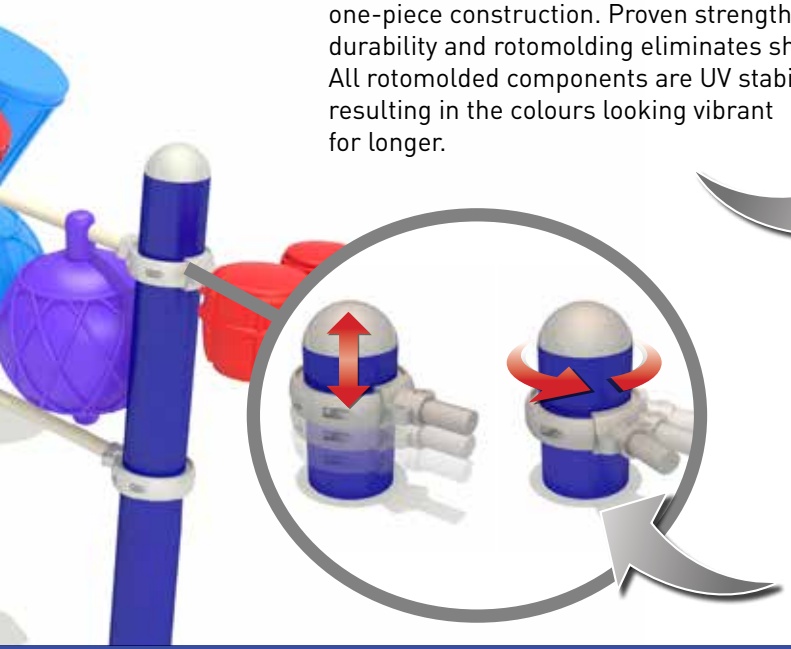
300 GRADE STEEL WITH RUBBER COATING FOR STRENGTH AND PROTECTION

All Playdium decks and stairs are constructed from 300 Grade Steel with additional support framework weighing in at nearly 60 kilos each. This is coated in a long lasting heavy duty rubber coating designed to minimise rust and provide many years of continuous use.

UV STABILISED LDPE PLASTIC FOR LONGER LASTING COLOUR

The rotomolded LDPE plastic panels are of a one-piece construction. Proven strength and durability and rotomolding eliminates sharp edges. All rotomolded components are UV stabilised resulting in the colours looking vibrant for longer.

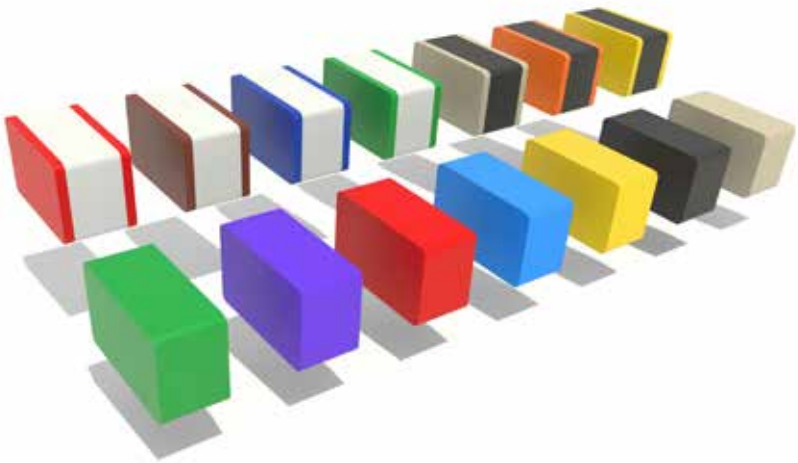




ROUND CLAMPS AND POSTS FOR SUPERIOR LOOK AND PERFORMANCE

114mm diameter round posts and alloy clamps give a premium look whilst providing design aesthetics. Individual clamps give flexibility to adjust heights of overhead elements - such as monkey bars.

COLOUR OPTIONS



HIGH-DENSITY POLYETHYLENE (HDPE)

HDPE is used in most interactive panels with detailed embossed graphics and is available in these 14 colours

- RED/WHITE
- BROWN/WHITE
- BLUE/WHITE
- GREEN/WHITE
- TAN/BLACK
- ORANGE/BLACK
- YELLOW/BLACK
- GREEN
- PURPLE
- RED
- SKY BLUE
- YELLOW
- BLACK
- TAN

LOW-DENSITY POLYETHYLENE (LDPE)

LDPE is used in all rotomoulded components and is available in these 12 colours

- BLUE
- SKY BLUE
- TEAL
- GREEN
- LIME GREEN
- YELLOW
- ORANGE
- RED
- TAN
- BROWN
- PURPLE
- MAGENTA

THERMOPLASTIC POLYESTER POWDER COATING

The powder coating is available in these 13 colours

- RED
- ORANGE
- YELLOW
- BROWN
- GREEN
- LIME
- TEAL
- BLUE
- PURPLE
- BLACK
- SILVER
- TAN
- WHITE

POLYESTER BRAIDED CARBON STEEL ROPE

The polyester braided Carbon Steel Rope is available in these 2 colours

- RED
- BLACK

PLAYDIUM PLAYGROUND EXAMPLES

Imaginationplay®
Total Recreational Solutions

PLAYDIUM PLAYGROUND EXAMPLES

PRESCHOOL 2-4 YRS

Pre School playgrounds have a much lower profile with minimal climbing components. Most play items are at ground level to keep younger children safe from falling from high places. Places you would find this type of playground are day-care and Preschool play areas.

PRIMARY 4-12 YRS

Primary school playgrounds have more traditional static play items such as slides, climbers and overhead items. Dynamic items like swings and spring riders are often absent in school playgrounds due to a lack of supervision.

SENIOR 8-14 YRS

School playgrounds for senior kids move away from traditional play components like slides and play panels. Senior playgrounds are generally more physically demanding to help them develop skills like balance and strength.

COMMUNITY 4-14 YRS

Playgrounds in public spaces like parks have a wider assortment of play items suitable for toddlers through to teenagers. Community playgrounds would often have ramps for equal access and seating areas for parental supervision.

FAMILY LEISURE 4-12 YRS

Playgrounds found in a more privately owned space like caravan parks, hotels and resorts are often themed and custom designed, tailored to best suit the site.

ENCLOSED 4-12 YRS

Enclosed playgrounds are designed to have very specific points of access at ground level. This eliminates the need for a 360° space of circulation and could be designed to fit any location of an enclosed space.

FUN FOR ALL

At Imagination Play, we take inclusivity seriously. For this reason we are working with a team of experts to develop good, inclusive play equipment and design truly accessible play areas.

SOCIAL / EMOTIONAL

For play to be truly inclusive, children need to be socially included. As children play together, they learn to cooperate, take turns, and engage in meaningful dramatic and imaginative play experiences that create lifelong memories. Providing places for children to feel emotionally secure allows them to belong and choose how and when to engage in play.

PHYSICAL

All children need opportunities to be physically active through play. Play environments that provide a variety of developmentally appropriate activities offer healthy risk, and challenge children of all abilities, create places where everyone wants to play.

SENSORY

Play is the most meaningful in sensory-rich environments that encourage discovery and exploration. Sensory play through tactile, visual, auditory, smells and tastes, vestibular and proprioceptive experiences help children understand the world around them.

COGNITIVE

Children learn through play and interacting with the people and world around them. Supporting intuitive play behaviours that stimulate development can help keep children engaged in meaningful play for longer periods of time. Opportunities for children to problem solve, think abstractly, and develop cause and effect skills help provide unique hands on opportunities to bring learning outside.

COMMUNICATION

Playgrounds can support the development of receptive and expressive language, allowing children to demonstrate what they know and express themselves. Language development occurs through natural play behaviour and routines and is enhanced through developmentally appropriate.

TOGETHER

GameTime®

GameTime is a premium brand from the Playcore group of companies, the largest manufacturer of park and recreation equipment in the USA.
Imagination play are proud to bring this premium American made brand to the Australian market.

Imagination play©
ROPE SERIES

Imagination Play are proud to offer an extensive range of rope based play elements. From centerpoint masts up to a massive 15m high structure.

Exo skeleton structures, modular rope sections and the ability to offer custom rope designs to meet your conceptual needs.

IJSLANDER

Founded in 1996, Ijslander is a company based in Netherlands. They Manufacture and supply contemporary stainless steel structures for public spaces ranging from furniture to outdoor play systems.

Russell Play

Russell Play is a UK based company with a large product range of both traditional and contemporary outdoor products. Russell Play offer design and innovation with an emphasis on inclusive play for children of all abilities to enjoy. Rusell Play offer a special Colourgalv Marine finish for Coastal environments.

OUTDOOR-FITNESS-AUSTRALIA

AUSTRALIA'S LARGEST RANGE

A Division of Imagination Play

The extensive rage of equipment we offer can accommodate all budgets and area sizes.

Our outdoor fitness equipment is made of strong and durable materials suitable for heavy use in public spaces. It is designed to weather tough outdoor conditions, to allow for year-round functional fitness.

Units are carefully designed so that users apply their own body weight as resistance. They are deliberately not adjustable to avoid injury due to overexertion and to ensure they cannot be easily vandalised.

Freenotes Harmony Park™
A PLAYCORE Company

OUTDOOR MUSICAL INSTRUMENTS FOR ALL AGES AND ABILITIES

Aesthetically pleasing instruments for commercial use in your school and open space. Premium quality instruments that are always perfectly tuned with no wrong notes. For all ages, durable, low maintenance and no power required.

MUSIC IS A JOY!

Music is a global, artistic language that creates community, connection and a sense of belonging. Some studies suggest that music is older than speech and language and speech may have even evolved from music. The primal power of music evokes emotions, memories and image, taking the participant on a magical journey.

COGNITIVE FUNCTION

Music helps to build reasoning skills and cognitive development. It can increase the capacity of your memory, refine time management and organisational skills and teaches perseverance.

EMOTIONAL

Playing music is fun! It builds confidence encourages creativity and self expression. It can reduce anxiety, relieve symptoms of depression, and elevate your mood. It just makes people healthier and happier.

PHYSICAL

Playing and listening to music can reduce stress, ease pain, lower blood pressure, increase workout endurance, improve sleep, enhance blood vessel function and help you eat less.

COMMUNITY

As we co-create music we grasp a sense of joy, our focus and social engagement align without effort. Playing music with others fosters deep listening, respect, a sense of belonging and builts community.

SURFACING

Imagination Play provide a range of softfall surfacing including:

Timber Mulch – An economical wood based softfall surface.

Flecks TPR – Thermo Plastic granulated rubber developed to withstand fading, Ultra Violet (U.V.) degradation, is Chlorine resistant, anti-fungal, anti mould and has anti-bacterial additives is a superior softfall surfacing. www.flecks.com.au

EPDM (Ethylene-Propylene-Diene-Monomer) - is a bright coloured synthetic rubber which is granulated for use in wet pour surfaces. EPDM is solid coloured rubber granules containing no dust or buffing's.

CSBR Rubber – CSBR (Coloured Styrene Butadiene Rubber) is recycled tyre rubber granules or buffing's which are colour coated in a mixer.

EnviroFluff ® – Newly patented EnviroFluff® cushion with-stands environmental deterioration and provides much better drop heights than traditional SBR Rubber. This cushion can be used in water play areas as it also is Chlorine resistant.

Rubber Tiles – Easy to lay dual-layered recycled CSBR/rubber granule product cast into square tiles for playground under surfacing using a unique XLock locking system.

SHADE

Children love to play outdoors, but with Australia's harsh conditions and the open spaces that our beautiful country offers, it can be hard to find a shaded area to avoid the suns heat and Ultra violet radiation (UVR).

The best way to create permanent shade is with a shade sail. Shade sails are a great alternative for a permanent structure which are highly effective and affordable. The use of shade sails also ensures that you'll be protected against any unexpected weather changes.

We can provide custom made shade sails & structures in all different shapes and sizes to suit almost any requirement. Imagination play provides quality design and installation of shade sails made from the highest quality materials in a wide range of colours.

Shade sails are beneficial for any outdoor play areas and commercial area that needs safeguarding against sun, wind and rain. Designed to keep the designated area protected and comfortable.
