HIGH-QUALITY
STAINLESS
STEEL FITTINGS

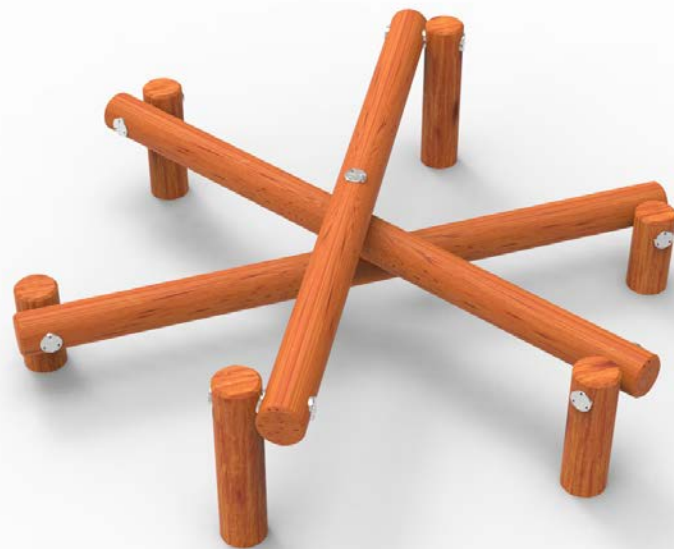

The timber we use in our nature play products and towers is sustainably and selectively sourced.

Additionally our timber is a range of naturally seasoned and kiln-dried Australian Hardwoods that are finished and processed to ensure all timbers are de-barked, cracks are filled and all edges are finished smooth to minimise any future splitting that natural timber is prone to in-turn ensuring a compliant, safe, splinter-free and long lasting nature-play space.

Our timber products make use of our unique Stainless Steel hardware that joins multiple pieces of timber together safely and ensures a secure life-long fit.
