

 STREETCOLLECTIVE

STREET FURNITURE

Street Collective is proudly and exclusively distributed in Australia & Oceania by
Imagination Play

At Street Collective, we love urban and natural environments!

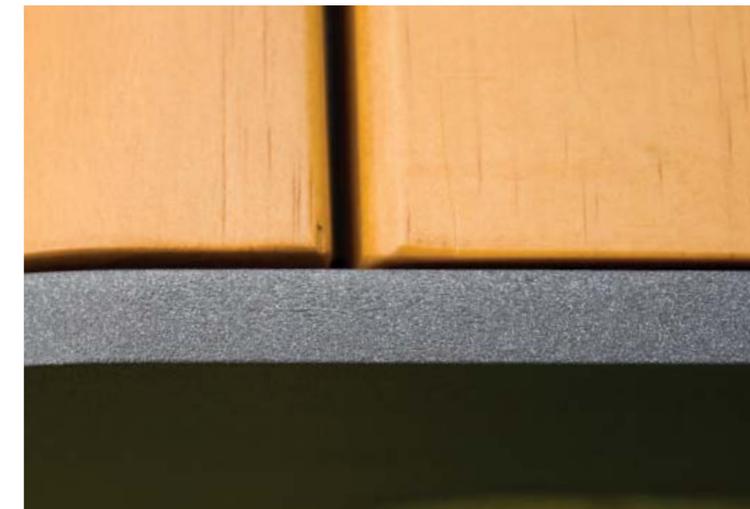

Street Collective specialises in the design, manufacture, supply and installation of street furniture. Our experienced landscape architects, product designers and engineers have developed a beautiful range of urban furniture that will enhance any street or park. Our versatile range includes **benches, seats, tables, litter bins, tree grilles, tree protectors, bollards, bicycle stands and Urban Play elements.**

Silhouette is a uniquely designed range of urban sculpture and play pieces. The simple beauty of these items will transform any public space or park.

Street Collective is fully accredited to the highest standards and operates a Quality Management System approved to BS EN 9001:2008 and an Environmental Management System to BS EN 14001:2004.

Our staff receive training to comply with Construction Design and Management Regulations 2007, Approved Code of Practice and Health and Safety awareness and competency training to comply with Health and Safety at Work regulations.

Street Collective is designed for public space use. Street Collective is a trading division of Russell Leisure Limited, a long established designer, manufacturer and installer of playground equipment and street furniture. Street Collective is exclusively distributed in Australia by Imagination Play.

OUR VISION

Street Collective believes that **any environment can be transformed into an area that everyone can enjoy.** A space where people can relax and socialise, or savour the beauty and tranquillity of nature with all its colours, smells and sounds.

Enjoyable urban areas do not evolve by themselves. They are designed and developed with care, thought and feeling. We believe that well designed urban furniture can greatly complement the aesthetics and functionality of any public area.

Street Collective products are built to last. Only the best materials and finishes have been used for our products to ensure both beauty and resilience in all sorts of environments. Sustainable materials like Accoya (Cradle to Cradle gold certification) and excellent finishes like hot dip galvanising and powder coating guarantee a long product life.

SERVICES

Imagination Play can offer a variety of services.

Our in house design team can offer you great **designs for your park or street scheme.** We can assemble and install the products for you and we offer full landscaping and turnkey project management. Alternatively, we can supply the products and ship them to the desired destination. If you are interested in our estimators will calculate the cost of shipping the products to you.

It is also possible to arrange the transport yourself and have the flat packed products picked up from our warehouse.

We offer full after-sales support and we are available to give advice on any service or maintenance issues.

SESSIO

BENCHES AND SEATS

The Sessio seats and benches with their elegant design will add great style to your park or street. They are ergonomically designed to ensure a comfortable and relaxing experience for users.

SESSIO SEAT

The Sessio seat is available in a **timber or a metal** version:
The seating part of the timber version has a hot dip galvanised and powder coated frame that connects the 13 beautifully finished Accoya timber slats.
The metal seating part consists of two parts and is made of strong 2mm thick galvanised and powder coated steel.
The solid 6mm thick curved legs are available in a hot dip galvanised and powder coated or in a stainless steel version.
Installation options: surface or in-ground fixing, or for loose fill.

SESSIO BENCH

The Sessio bench is available in a **timber or a metal** version:
The seating part of the timber version has a hot dip galvanised and powder coated frame that connects the 6 beautifully finished Accoya timber slats.
The metal seating is made of strong 2mm thick galvanised and powder coated steel.
The solid 6mm thick curved legs are available in a hot dip galvanised and powder coated or in a stainless steel version.
Installation options: surface or in-ground fixing, or for loose fill.

ISTUU

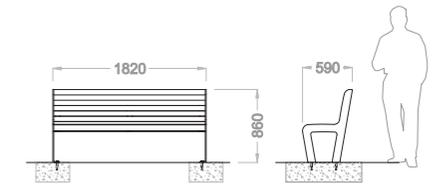

BENCHES AND SEATS

The Istuu seats and benches are attractive, modern looking street furniture. Their ergonomic design ensures maximum comfort and relaxation for the user.

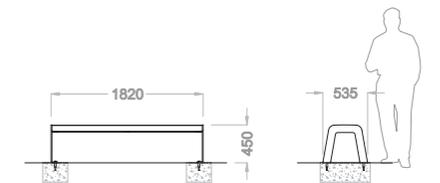

ISTUU SEAT

The Istuu seat is available in a **timber or a metal** version:
The seating part of the timber version has a hot dip galvanised and powder coated frame that connects the 13 beautifully finished Accoya timber slats.
The metal seating part consists of two parts and is made of strong 2mm thick galvanised and powder coated steel.
The construction is very solid with 10mm thick hot dip galvanised and powder coated steel legs.
Installation options: surface or in-ground fixing, or for loose fill.

ISTUU BENCH

The Istuu bench is available in a **timber or a metal** version:
The seating part of the timber version has a hot dip galvanised and powder coated frame that connects the 6 beautifully finished Accoya timber slats.
The metal seating part is made of strong 2mm thick galvanised and powder coated steel.
The construction is very solid with 10mm thick hot dip galvanised and powder coated steel legs.
Installation options: surface or in-ground fixing, or for loose fill.

ISTUU

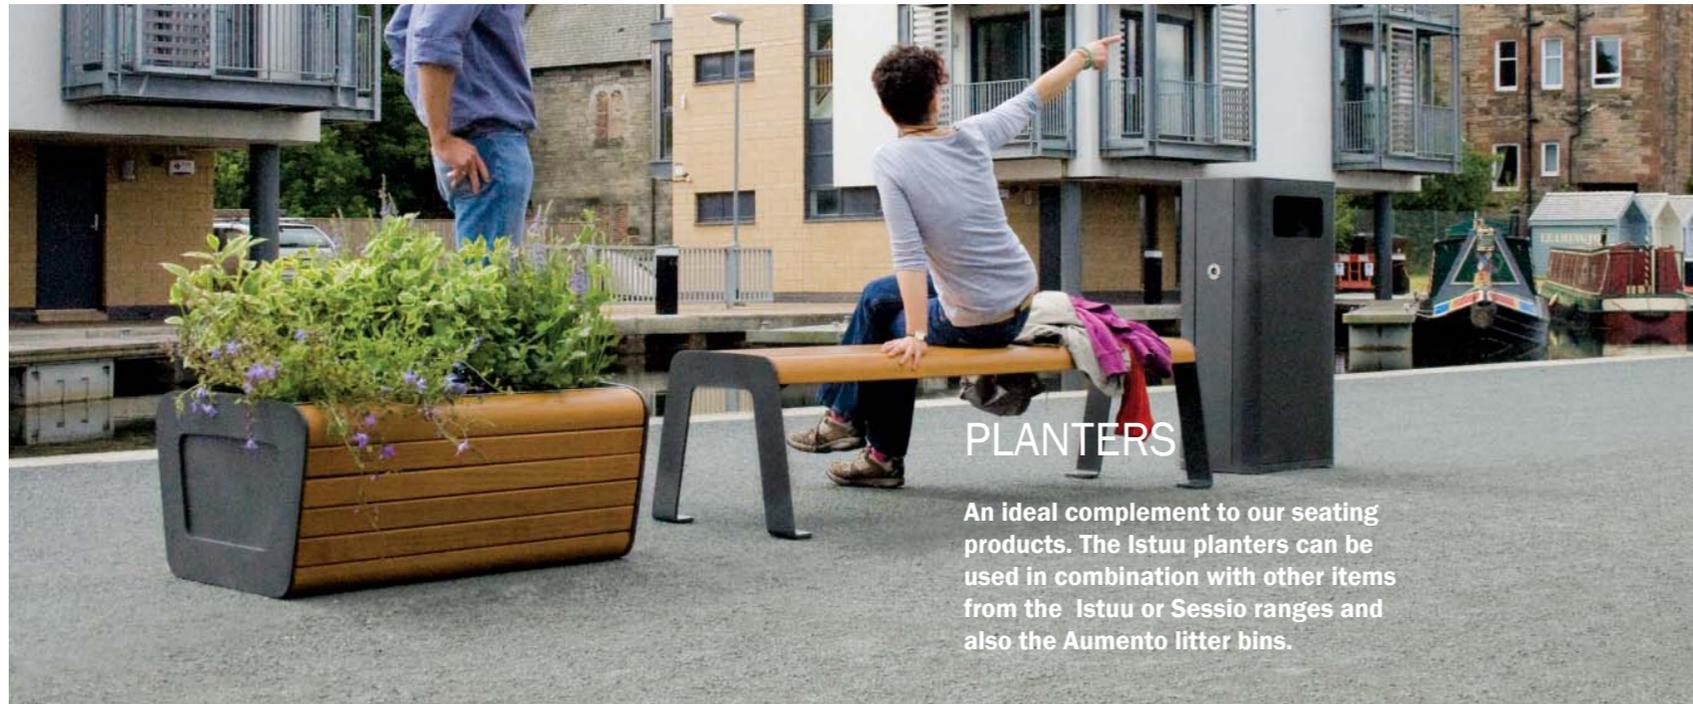

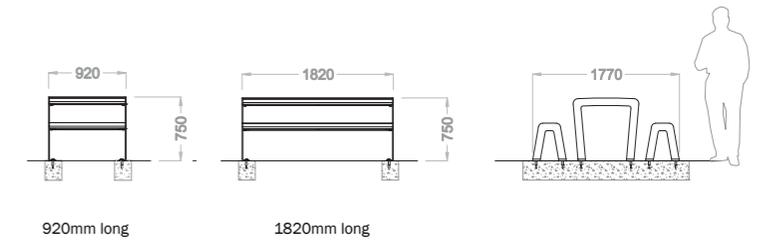

PICNIC SETS

The Istuu picnic set has a timeless and attractive design. The table has ample space for a wheelchair at either end. Together with the two picnic benches this is a truly inclusive place to get together.

ISTUU PICNIC SET

The Istuu picnic set is available in two sizes and in a **timber or a metal** version. The small picnic set is 920mm long and the big set is 1820mm long. The table top of the timber version has a hot dip galvanised and powder coated frame that connects the 11 beautifully finished Accoya timber slats. The metal version consists of two parts and is made of strong 2mm thick galvanised and powder coated steel. The construction is very solid with 10mm thick hot dip galvanised and powder coated steel end frames. **Installation options:** surface or in-ground fixing, or for loose fill.

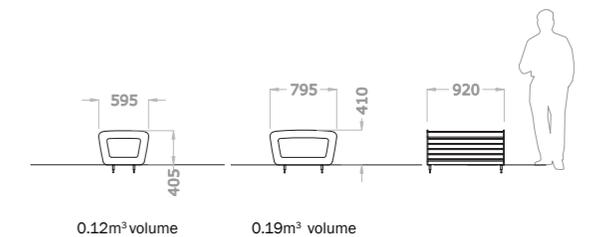

PLANTERS

An ideal complement to our seating products. The Istuu planters can be used in combination with other items from the Istuu or Sessio ranges and also the Aumento litter bins.

ISTUU PLANTER

The Istuu planter is available in two sizes and in a **timber or a metal** version. The liner of the small planter has a volume of 0.12m³, the one of the big planter has a volume of 0.19m³. The sides of the timber version have a hot dip galvanised and powder coated frame that each connect the 6 beautifully finished Accoya timber slats. The metal version is made of strong 2mm thick galvanised and powder coated steel. The construction is very solid with 10mm thick hot dip galvanised and powder coated steel end frames. **Installation options:** surface or in-ground fixing.

AUMENTO

LITTER BINS

The Aumento Litter bins have a timeless and attractive design. These well engineered products have solid hinges and are easy to use by your staff, preventing damage from both the user and the professional operator.

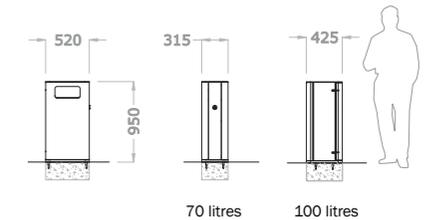

The door can easily be opened with a key and locks automatically when closed. The bin liner has two ergonomically placed handles. The big openings on either side of the bin have sloped gullies that make sure that rubbish will fall down and at the same time, make it hard to pick rubbish out.

AUMENTO GALVANISED AND POWDERCOATED LITTER BIN

The galvanised and powder coated Aumento litter bin is available in two sizes: 70 and 100 litre. Each version is available with or without an ash tray. The construction is very solid with its 2mm thick galvanised and powder coated steel construction. The bins are available with a variety of key lock options to suit your requirements.

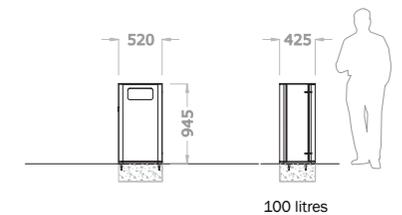

Installation options: surface or in-ground fixing, or for loose fill.

AUMENTO STAINLESS STEEL LITTER BIN

The stainless steel Aumento litter bin has a volume 100 litres and is available with or without an ash tray. The construction is very solid with its 2mm thick polished stainless steel construction. The bins are available with a variety of key lock options to suit your requirements.

Installation options: surface or in-ground fixing, or for loose fill.

AUMENTO

TREE PROTECTORS

A range of stylish tree or lamp post protectors designed to enhance the urban environment. These are designed to protect trees from damage by machinery, vehicles and other hazards.

TREE GRILLES

The Aumento tree grille has a beautiful leaf pattern and will stand out in the street. The 10mm thick metal quarter pieces can be combined into many shapes and are fixed to a solid base frame with tamperproof fittings.

BOLLARDS

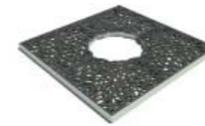

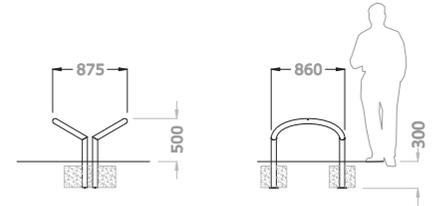

A range of bollards which are both aesthetically pleasing and extremely robust. These are available in a range of metal finishes.

AUMENTO TREE PROTECTORS

The Aumento tree protectors can be used singly or as a pair. The tree protectors are available in galvanised only, galvanised and powder coated or in stainless steel versions. The construction is very solid with its 60mm tube with a 3mm wall thickness.

Installation options: in-ground fixing, or for loose fill.

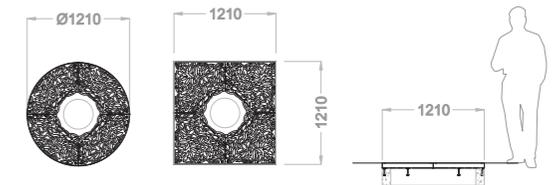

AUMENTO TREE GRILLES

The Aumento tree grilles consist of 4 quadrants. The quadrants can be round or square, allowing for lots of options to create the desired shape: from round to square and anything in between.

The tree grilles have a hot dip galvanised base frame and are available with galvanised only or galvanised and powder coated top quadrants. The construction is very solid with the 10mm thick quadrants that are fixed to the 3mm thick base frame.

Installation options: surface or in-ground fixing.

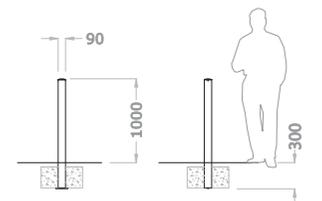

AUMENTO BOLLARDS

The Aumento bollards are available in a multitude of different versions to suit your requirements. The bollards either have a slightly domed or a mitred top.

Both shapes are available in galvanised only, galvanised and powder coated or in stainless steel. The bollards can be supplied with a highly reflective sticker.

Installation options: in-ground fixing, or for loose fill.

AUMENTO

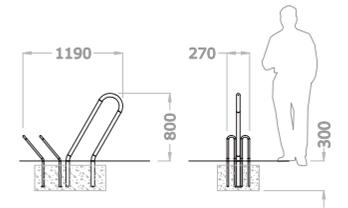

CYCLE STANDS

Our designers looked at cycle stands from a new angle. All sizes of bikes will stand stable and are easily locked with both wheels against this attractive stand.

AUMENTO CYCLE STANDS

The Aumento cycle stands are available in a variety of versions to suit your requirements. The product can be supplied as a stand only, available in in-surface fixing or in-ground fixing versions. It can also be supplied with one or with 2 wheelholders. These products are only available for in-ground fixing. All versions are available in galvanised only, galvanised and powder coated or in stainless steel. **Installation options:** surface fixing (stand-only version) and in-ground fixing (all versions).

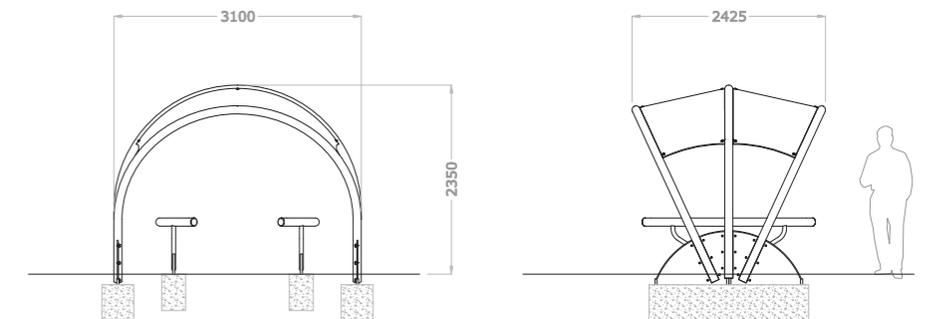

SHELTERS

Stylish and functional, these shelters can be used for cycle parking or fitted with seating. They are fully hot dip galvanised and powder coated and are available in colours to suit the surroundings.

AUMENTO SHELTERS

The Aumento shelters are available in 3 sizes: small, medium and large. The arches are galvanised only and the roof is galvanised and powder coated. The shelters can be combined with our Aumento cycle stands or with our special leaning seats. **Options:** in ground fixing only.

URBAN PLAY

Adults may wonder if these stainless steel objects are contemporary art. In the meantime kids will find out how much fun it is to climb, tumble round and slide off these objects. For teenagers, these objects mean that Parkour can be taken to a new level!

SILHOUETTE CLIMBING AND BALANCING

The simple beauty of these play pieces will transform any public space or park.
Options: Available in hot dip galvanised and powder coated finish or in stainless steel.

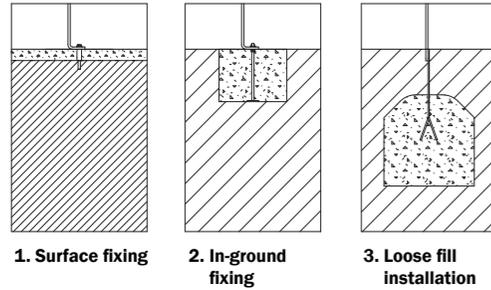

SILHOUETTE CLIMBING AND SLIDING

Slides were never known for their beauty until our range of Silhouette climb and slide products appeared. Have a look at the impressive Roller Coaster or the beautiful Rapid or Chute.
Options: Available in hot dip galvanised and powder coated finish or in stainless steel. The slide elements are only available in stainless steel.

INSTALLATION OPTIONS

We offer various installation options on our products to match specific requirements:

- 1. Surface fixing** (we supply Rawl bolts as an optional extra)
- 2. In-ground fixing** (we offer our Street Collective anchors for concreting in as an optional extra)
- 3. Loose fill installation** (the product has extended legs for loose fill areas like sand or bark)

Important Note

To make sure that the products are stable, it is very important that the foundations have the right dimensions and weight. You can find the recommended dimensions for the foundations in the Product information PDF of each product on our website.

FINISH OPTIONS

Street Collective offers various finishing options:

• Galvanised only

These parts or products are hot dip galvanised. Galvanising is carried out in accordance with EN ISO 1461

• Galvanised and powder coated - Colougalv

These parts are hot dip galvanised and powder coated in one continuous process. The electrostatically applied polyester powdercoating gives steel a beautiful, coloured or textured finish.

• Galvanised and powder coated - Colougalv Marine

Colougalv Marine is similar to standard Colougalv in that it has both a hot-dip galvanized substrate and an electrostatically applied powder coat finish. The difference is the hydrophobic middle coat that prevents oxidation of the zinc and thus keeps the powder top coat intact; especially important if the product is in constant contact with salt spray or is submersed.

• Stainless steel

We use stainless steel 304 and polish it to a smoothness of Ra 0.6 micron to prevent chloride ions being able to enter the surface and start the corrosion process.

Colours

Frame parts are available in 21 RAL colours and four beautiful 'specials', namely Bleu Sable, Sanaga Sable, Silver Sparkle and Lutetium. Metal surfaces are available in 21 RAL colours.

Please visit our website to see all our beautiful colour options.

SUSTAINABILITY

At Street Collective, we are aware that natural resources are limited. We want to take responsibility for the materials and processes that are used to manufacture our products. For the sake of future generations, we want to work in a sustainable way.

We operate a sustainability policy throughout our production processes by:

Developing products that will last; using high quality sustainably sourced Accoya timber; offering a long lasting finish through a continuous galvanising and powder coating process; selecting vandal resistant fittings

on all our products; using local suppliers and manufacturers within 30 miles to our premises; minimising fuel consumption and energy spent during the transport of our products through flat packaging; using re-usable materials and pursuing a cradle to cradle philosophy.

Only **the best materials and finishes** have been used for our products **to ensure both beauty and resilience** in all sorts of environments. Sustainable materials like Accoya timber (cradle to cradle gold certification) and excellent finishes like hot dip galvanising and powder coating guarantee outstanding warranties.

ACCOYA

Accoya timber is an **acetylated soft wood** that has properties exceeding those of the best hardwoods and is **sourced from fast-growing**, sustainable Radiata Pine forests.

This means: The timber does not absorb water and is therefore dimensionally stable under all climatic conditions. And Accoya timber has zero toxicity. Please refer to our website for the full technical specification.

METALS

We use high quality Laser cut sheet and plate materials. Plate and tube materials are used for frame. We use 6mm stainless (S304) and 10mm thick and mild steel (S275) plate. Tube materials vary in sizes per product type, but are generally 3mm thick.

Sheet materials are used for large surfaces. We use 2mm thick high quality lasercut steel components and hot dip galvanise and powdercoat them.

SEASIDE LOCATIONS

Seaside locations are very harsh environments. For that reason we offer special finish options for these areas. If you are planning on installing near coastal areas which are subject to salt water conditions or spray, we

recommend you use a **Colougalv Marine finish**. We can also supply products or parts in special 'marine grade' Stainless steel S316. Feel free to contact our office to discuss these options.
